CORE CAPABILITIES

Product strategy and roadmap ownership | Technical product management | Platform architecture collaboration | AI-enabled workflow design | Cloud and mobile delivery | Release planning and governance | Cross-functional leadership | Requirements and prioritization | Delivery forecasting and risk management | Stakeholder communication | Operational process improvement | Technical discovery and solution design

Technology Stack

• Languages

Python | SQL | Java | PHP | JavaScript | TypeScript | Kotlin | Swift | Dart

• Frameworks

Flutter | Laravel | Flask | React Native/Expo

• Mobile

Flutter (iOS & Android) | Kotlin Jetpack Compose | Swift UIKit

• Backend

REST APIs | Flask API | Laravel Nova | API Gateway | Microservices

TECHNICAL PRODUCT & PLATFORM LEADER | AI, CLOUD, MOBILE, DELIVERY

Technical product, platform, and solutions leader with 10+ years of experience delivering cloud-backed software, mobile applications, AI-enabled workflows, and operational platforms across complex business environments. Known for turning ambiguous business needs into shipped products, scalable architectures, and measurable delivery improvements. Blend product ownership, technical architecture fluency, and execution discipline across roadmap planning, release governance, workflow automation, and cross-functional leadership.

EXPERIENCE

SENIOR TECHNICAL PRODUCT MANAGER • JUNE 2022 — PRESENT

Appstango • Lehi, Utah

Lead product planning, technical delivery, and operational execution across AWS-backed mobile and web platforms spanning multiple client environments and user bases from startup scale to **500,000+ users**.

- Directed roadmap, backlog, sprint planning, and cross-team execution across **4 software platforms over 3+ years**, aligning engineering work with client priorities, technical feasibility, and delivery risk.
- Orchestrated and executed platform delivery and release governance for systems serving **500,000+ daily users across global markets**, improving **deployment quality, engineering alignment, and execution reliability** across mobile, backend, and cloud environments.
- Implemented delivery tracking and forecasting improvements that **reduced delivery delays by 20%**, increasing predictability, visibility, and planning accuracy for leadership and clients.
- Served as the connective layer across engineering, QA, design, and executive stakeholders, translating business needs into clear user stories, acceptance criteria, technical specifications, and release plans.
- Partnered with engineers on **API design, database schema reviews, and AWS environment strategy**, improving maintainability, scalability, and production readiness across multiple products.
- Drove structured release planning, stakeholder feedback loops, and governance processes that reduced ambiguity, accelerated decision-making, and improved alignment across technical and non-technical teams.
- Led delivery across products serving **hundreds of thousands of daily end users**, including consumer apps, operational

• Cloud & DevOps

AWS (Cognito | Lambda | S3 | RDS | EC2 | CloudFront | API Gateway) | Azure Functions | Docker | GitHub Actions | GitLab CI/CD

• AI / Data Systems

Prompt Engineering | LLM Workflows | Model Evaluation | Vector Search | Data Processing | AI Automation

• Infrastructure

AWS (Lambda, S3, RDS/Aurora, API Gateway) | Azure Functions | REST APIs | Python | Flask | Serverless Architecture | Pipeline Orchestration Concepts

• Tools

Jira | Confluence | Figma | Docker | GitHub Actions | GitLab CI/CD | Postman | Swagger/OpenAPI | n8n

EDUCATION

MS: ENGINEERING AI AND MACHINE LEARNING • 2025

Western Governors University
SLC, Utah

BS: COMPUTER SCIENCE-SOFTWARE ENGINEERING •

Western Governors University
SLC, Utah

AS: BIOLOGY •

Utah Valley University

CERTIFICATIONS

- CompTIA Project+
- ITIL Foundations – IT Service Management
- AWS Certified Cloud Practitioner
- Lean Six Sigma Yellow Belt
- PMP Certification (In-Progress)

INTERESTS

- Family
- Photography & Videography

platforms, and pilot initiatives, demonstrating range across regulated, workflow-heavy, and user-facing environments.

SOLUTIONS ARCHITECT • DEC 2023 — DEC 2025

Utah Tech Labs • Draper, Utah

Lead architecture and product development for AI-enabled platforms that automate complex operational workflows across construction, field operations, and document-driven industries.

Key Contributions

Vega AI Estimating Platform

- Led architecture and platform design for Vega, an AI-powered construction estimation system that converts blueprint plans into structured material takeoffs and cost estimates.
- Designed AI ingestion pipelines using OCR, document parsing, and LLM-assisted analysis to extract square footage, materials, and quantities across **35+ subcontractor categories**.
- Built scalable workflows integrating AI services, backend APIs, and review interfaces enabling estimators to validate and adjust AI-generated outputs.
- Coordinated product development across engineering, construction estimators, and leadership to align AI outputs with real-world estimating workflows providing an **99% accuracy** score compared against a control group of 11 independent estimators on the same project.
- Delivered AI-assisted estimation workflows capable of producing takeoffs up to **32x faster than traditional manual estimating methods**, reducing estimation cycles from hours or days to minutes.
- Enabled contractors to **increase bid capacity by 200–300%** while reducing manual estimating effort and improving estimate accuracy.

QA ENGINEER & DIGITAL TRANSFORMATION LEAD • AUG 2008 — APR 2022

Geneva Rock Products • Utah

- Supported digital transformation initiatives across QA systems, reporting workflows, and infrastructure platforms in a complex field operations environment.
- Led testing, rollout, and adoption of Stonemont QC and company-wide equipment tracking systems used by **100+ field and operations personnel**.
- **Reduced manual reporting time by 30%** by redesigning workflows and automating data collection processes.
- Built 14 years of experience delivering reliable systems in compliance-driven, high-uptime operational environments.
