EDUCATION

MS: AI ENGINEERING • 2025
Western Governors University
SLC, Utah

BS: SOFTWARE ENGINEERING • 2025
Western Governors University
SLC, Utah

AS: BIOLOGY • 2017
Utah Valley University
Orem, Utah

CERTIFICATIONS

- CompTIA Project+
- ITIL Foundations – IT Service Management
- AWS Certified Cloud Practitioner
- Lean Six Sigma Yellow Belt
- PMP Certification (In Progress)

KEY SKILLS

Technical

• **Languages:** Python, Dart, Java, PHP, JavaScript/TypeScript, Kotlin, Swift, SQL, HTML/CSS, Bash

PROFILE

Software Engineer · AI Engineer · Product/Project Manager with a strong background delivering scalable software systems across mobile, backend, and cloud platforms. Skilled at bridging technical execution and product strategy, contributing directly to architecture, hands-on engineering, and structured product delivery to ship reliable, high-impact solutions. Recognised for clear communication, rapid problem-solving, AI-driven solution design, and strong engineering execution across the full SDLC.

EXPERIENCE

SENIOR PROJECT/PRODUCT MANAGER • MAY 2022 — PRESENT

Appstango • Lehi, Utah

Partnered with engineering, design, and QA to deliver scalable mobile and web applications across multiple client verticals. Led planning, backlog management, and sprint execution while contributing directly to technical architecture and engineering workflows.

- Delivered full product lifecycles across Flutter, Laravel, and AWS-based environments, contributing to architecture, requirements, and implementation planning.
- Architected and reviewed mobile APIs, database schemas, and AWS cloud environments used by thousands of users.
- Implemented data tracking and forecasting improvements, reducing delivery delays by 20%.
- Served as Technical Product Owner, aligning engineering teams around measurable outcomes while ensuring technical feasibility and maintainability.
- Translated stakeholder needs into actionable user stories, acceptance criteria, and technical specifications.
- Led cross-team communication between engineering, QA, and client leadership.

MANAGED PRODUCTS:

- [The Essential Life App](#)
- [Seeds of Thyme](#)
- [Companion ATM Management Systems](#)
- [TA in a Box \(UVU Pilot program\)](#)

• **Frameworks:** Flutter, Laravel, Flask, Angular, React Native/Expo

• **Mobile:** Flutter (iOS/Android), Kotlin Jetpack Compose, Swift/UIKit

• **Backend & APIs:** REST APIs, Laravel Nova, Flask API, AWS Lambda, API Gateway

• **AI/ML:** Model evaluation, supervised/unsupervised learning, prompt engineering, vector search, data preprocessing, LLM workflow design

• **Cloud & DevOps:** AWS (Cognito, S3, Lambda, CloudFront, RDS, EC2), Azure Functions, GitHub Actions, GitLab CI/CD, Docker

• **Data & Storage:** MySQL, Aurora, Hive, MongoDB, SharedPreferences, Firebase/Firestore

• **Tools:** Postman, Figma, Jira, Confluence, n8n, Swagger/OpenAPI, Firebase Suite

Product & Leadership

• **Product Ownership:** Agile/Scrum Leadership • Stakeholder Communication
Risk Mitigation • Data-Informed Decision Making • Cross-Functional Alignment
Technical Discovery • Requirements Analysis • Release & Delivery Management

INTERESTS

- Family
- Photography & Videography
- Open Source Software

SOLUTIONS ARCHITECT • DEC 2023 — PRESENT

Utah Tech Labs • Draper, Utah

Designed technical architectures integrating software, hardware, and field operations for maintenance and tracking platforms.

- Architected multi-component platforms using AWS, Python, and microservice-aligned patterns, ensuring scalability and maintainability.
- Developed workflow automations, integrations, and backend logic that streamlined vendor and operations processes.
- Produced technical documentation, diagrams, and rollout strategies for enterprise stakeholders.
- Conducted discovery with field users to translate inefficiencies into scalable system features.
- Ensured high-uptime architectures and robust testing processes for mission-critical software.

QA ENGINEER & PROJECT COORDINATOR • AUG 2008 — APR 2022

Geneva Rock Products • Utah

Led digital transformation efforts across QA management, reporting systems, and infrastructure technology, contributing to system requirements, testing, and implementation.

- Managed testing, rollout, and adoption for Stonemont QC and company wide equipment tracking systems.
- Collaborated with operations leadership to deploy compliance and field-use software.
- Reduced manual reporting time by 30% through workflow redesign and data automation.
- Coordinated projects between engineering teams, operations, and external vendors.
