EDUCATION

MS: AI ENGINEERING • 2025
Western Governors University
SLC, Utah
Focus: Applied machine learning,
LLM workflows, model evaluation,
data pipelines, AI system design

BS: SOFTWARE ENGINEERING • 2025

Western Governors University
SLC, Utah

AS: BIOLOGY • 2017

Utah Valley University
Orem, Utah

CERTIFICATIONS

- CompTIA Project+
- ITIL Foundations – IT Service Management
- AWS Certified Cloud Practitioner
- Lean Six Sigma Yellow Belt

CORE STRENGTHS

- Principal & Solutions Architecture Ownership
- Client-Facing Architecture & Discovery
- Cloud Architecture (AWS & Azure)

PRINCIPAL SOLUTIONS ARCHITECT | TECHNICAL DELIVERY & PLATFORM LEADER | AI ENGINEERING (MS)

Principal-level Solutions Architect with 10+ years of experience owning architecture, delivery strategy, and platform outcomes for cloud-native, AI-enabled systems. Backed by a Master's degree in AI Engineering and a career spanning architecture governance, stakeholder partnership, and large-scale system delivery. Proven at translating business objectives into scalable, secure, and operationally reliable solutions across AWS-based environments.

EXPERIENCE

SOLUTIONS ARCHITECT • DEC 2023 – PRESENT

Utah Tech Labs • Draper, Utah

- Own end-to-end solution architecture and delivery strategy for multi-component platforms spanning software, hardware, and field operations
- Partner with clients and internal stakeholders to translate business objectives into scalable technical roadmaps and system designs
- Define cloud architecture standards across AWS with focus on scalability, security, cost efficiency, and operational reliability
- Lead technical discovery, architecture reviews, and architectural decision-making across cross-functional teams
- Integrate AI-enabled workflows for automation, forecasting, and data-driven decision support within production systems
- Produce executive-ready architecture documentation, diagrams, and rollout plans
- Govern delivery quality, testing strategy, and system reliability for mission-critical platforms

- Distributed Systems & API Design
- Platform Scalability, Reliability & Cost Governance
- AI-Enabled Systems & Automation
- Delivery Governance & Cross-Functional Leadership
- Stakeholder & Executive Communication

Technical Expertise

- **AI & Data Systems:** AI Systems Architecture, Applied Machine Learning, LLM Workflow Design, Vector Search & Embeddings, Model Evaluation, Data Pipelines, Automation & Decision Systems
- **Cloud & Platform Architecture:** AWS (Lambda, Cognito, API Gateway, RDS, S3, EC2, CloudFront), Azure Functions, Cloud-Native Architecture, Microservices, Distributed Systems
- **Backend & APIs:** Python, Flask, REST APIs, API Architecture, Laravel, SQL, MySQL, Aurora
- **DevOps & Tooling:** GitHub Actions, GitLab CI/CD, Docker, Postman, Swagger/OpenAPI, Jira, Confluence, Figma, n8n

Product & Leadership Skills

- **Product Ownership:** Agile/Scrum Leadership • Stakeholder Communication
- Risk Mitigation • Data-Informed Decision Making • Cross-Functional Alignment
- Technical Discovery • Requirements Analysis • Release & Delivery Management

Interests

- Family

TECHNICAL PRODUCT MANAGER / SOLUTIONS LEAD • MAY 2022 — PRESENT

Appstango • Lehi, Utah

- Partner with solution architects and engineers to design and deliver multi-tenant mobile and web platforms across multiple client verticals.
- Translate stakeholder requirements into system architectures, APIs, and scalable cloud infrastructure.
- Support architecture governance, technical decision-making, and delivery execution across concurrent initiatives.
- Improve delivery forecasting and capacity tracking, reducing schedule variance by approximately 20%.
- Facilitate alignment across engineering, QA, design, and client leadership.

MANAGED PRODUCTS:

- [The Essential Life App](#)
- [Seeds of Thyme](#)
- [Companion ATM Management Systems](#)
- [TA in a Box \(UVU Pilot program\)](#)

QA ENGINEER & PROJECT COORDINATOR • AUG 2008 — APR 2022

Geneva Rock Products • Utah

- Led digital transformation initiatives across QA systems, reporting platforms, and infrastructure technology.
- Coordinated testing, rollout, and adoption of enterprise quality management and equipment tracking systems.
- Reduced manual reporting time by ~30% through workflow redesign and data automation.
- Acted as liaison between operations leadership, engineering teams, and external vendors.

- Photography & Videography
 - Open Source Software
